After graduating from my undergrad program into a sales-management position, I took a few beginner programming courses to help me better track my performance. In every position I've held, I've loved building programs to track specific metrics important to me and my career. Not only was it helpful to me in my career, but I discovered how much I enjoyed creating programs and piecing together solutions to each problem. After deciding to pivot my career to programming, I am currently completing a coding Bootcamp through NuCamp, constantly reading as much online documentation as possible, and creating an online portfolio of my current work. This is what I was meant to do.

CERTIFICATIONS

Bootstrap Course Certificate (July 02, 2022)

NuCamp Coding Bootcamp

Bootstrap includes HTML and CSS based templates for typography, forms, buttons, tables, navigation, responsive designs, modals, image carousels as well as optional JavaScript plugins.

nucamp.co

React Course Certificate (August 16, 2022)

NuCamp Coding Bootcamp

Learned the basics of React and Redux to build production-ready apps and user interfaces.

WORK EXPERIENCE

Root Insurance (April 14, 2020 - April 30, 2022)

Complex Liability Adjuster

As a complex liability adjuster, I investigate complex accident scenarios to solve potential coverage or liability issues for all parties involved. I detail all interactions with claim parties while maintaining excellent customer service. I utilize available resources for the continuing learning of policy and claims processes. I communicate with internal and external claim parties to bring claims to resolution.

Keybank (June 11, 2019 - March 31, 2020)

Digital Services Associate

As a digital services associate, I triaged and resolved web browser, software, and mobile application technical issues on both Windows and Mac for a diverse number of users. I engaged in development meetings to improve user experience. I provided online access rights to clients after passing a risk assessment. I maintained high client service while still performing within set data metrics.
